

ChagoITalk - Complete Development Roadmap

Project Goal

Build an anonymous voice and text chat platform inspired by AirTalk using ASP.NET Core MVC, .NET 10, Visual Studio 2026, SQL Server/SSMS 2022, SignalR and WebRTC.

Phase 0

Create Git repository, create ASP.NET Core MVC project, configure SQL Server, EF Core, Bootstrap, Git ignore.

Phase 1

Authentication: ASP.NET Core Identity, registration, login, profiles, roles.

Phase 2

Database: Users, Friends, FriendRequests, Messages, MatchQueue, Reports, Calls.

Phase 3

Landing page and dashboard.

Phase 4

Real-time text chat with SignalR.

Phase 5

Random matchmaking service and queue.

Phase 6

WebRTC voice calling, ICE/STUN/TURN, microphone permissions.

Phase 7

Friends, blocking, reporting.

Phase 8

Admin dashboard, moderation, logs.

Phase 9

Testing, deployment, HTTPS, domain, VPS.
